Indo-Pacific Logistics Challenge

- INDOPACOM operations face major logistics challenges:
 - Vast distances across the theater
 - Contested logistics environment
 - Limited infrastructure in key locations
 - Heavy reliance on commercial and host-nation networks
 - Current OCS posture optimized for CENTCOM/EUCOM, not INDOPACOM

ASSOCIATION

Critical Logistics Gaps

- Limited availability of Class IV construction materials
- Logistics nodes (ports & airfields) lack redundancy and resilience
- Shortage of planners, contracting officers, and vendor-vetting teams
- Dependence on host-nation infrastructure and labor
- Reallocating logistics capacity to INDOPACOM creates global trade-offs
